

Purpose Statement

601/8803/0 ProQual Level 3 Diploma in Fabric Maintenance for Technicians in the Energy Sector

Overview

This qualification has been developed to attract new workers into the offshore oil and gas industry, it is aimed at novices, and semi-skilled or skilled workers who wish to use their prior skills and experience to work in and develop a fruitful career in the industry.

Candidates will develop the knowledge and skills required to enable them to work as multi skilled fabric maintenance technicians in the offshore gas and oil industry.

Learning Outcomes

To develop new or existing skills, provide a foundation of knowledge and practice and a safety culture which could lead to further workplace experience and training, allowing candidates to develop into skilled workers and valued team members within the offshore oil and gas industry.

Candidates must complete 8 Mandatory units:

- An Introduction to Working in the Energy Sector
- Sea Survival in the Energy Sector
- Blaster Painter and Abrasive Wheels Operations in the Energy Sector
- Fireproofing Operations in the Energy Sector
- Rope Access Techniques in the Energy Sector
- Thermal Insulation and Cladding Operations in the Energy Sector
- Mechanical Joint Integrity Operations in the Energy Sector
- First Aid at Work in the Energy Sector

Candidates will work with an assessor to complete a portfolio of evidence that confirms they have met the requirements of the qualification.
