### Introduction

The ProQual Level 2 NVQ Diploma in Roadbuilding and Maintenance (Construction) – Manual Road Building is aimed at individuals working in a roadbuilding and maintenance environment. ProQual currently offers one pathway for this qualification – **Pathway 4: Manual Road Building – Crack & Joint Repair (Manual)** which is aimed at those who wish to demonstrate their competence in manually applying crack and joint repair surfacing materials.

The awarding body for the qualification is ProQual Awarding Body and the regulatory body is the Office of Qualifications and Examinations Regulation (Ofqual).

This qualification has been accredited onto the Regulated Qualifications Framework and it provides a progression route to discipline related qualifications.

## Qualification Profile: Level 2 NVQ Diploma in Roadbuilding and Maintenance (Construction)

Qualification title	ProQual Level 2 NVQ Diploma in Roadbuilding and Maintenance (Construction)
Ofqual qualification number	610/0512/5
Level	Level 2
Guided learning hours	200
Total qualification time	600 hours
Assessment	Pass or fail Internally assessed and verified by centre staff External quality assurance by ProQual verifiers
Qualification start date	21/2/2022
Qualification end date	

## **Entry Requirements**

There are no formal entry requirements for this qualification.

Centres should carry out an **initial assessment** of candidate skills and knowledge to identify any gaps and help plan the assessment.

## **Qualification Structure**

### Pathway 4 – Manual Road Building – Crack and Joint Repair (Manual)

To achieve the qualification candidates must complete 3 Mandatory units.

CITB reference numbers are given for information only.

Mandatory Units							
Unit Reference Number	Unit Title	Unit Level	GLH	CITB Ref. No			
T/508/6538	Conforming to productive working practices in the workplace	2	7	641			
M/508/6537	Conforming to general health, safety and welfare in the workplace	1	10	642			
T/650/1436	Manually applying crack and joint repair surfacing materials in the workplace	2	200	383Dv1			

## **Centre Requirements**

Centres must be approved to offer this qualification. If your centre is not approved please complete and submit form **ProQual Additional Qualification Approval Application**.

### Staff

Staff delivering this qualification must be appropriately qualified and/or occupationally competent.

### Assessors/Internal Quality Assurance

For each competence-based unit centres must be able to provide at least one assessor and one internal quality assurance verifier who are suitably qualified for the specific occupational area. Assessors and internal quality assurance verifiers for competence-based units or qualifications will normally need to hold appropriate assessor or verifier qualifications, such as:

- Level 3 Award in Assessing Competence in the Work Environment
- Level 3 Award in Assessing Vocationally Related Achievement
- Level 3 Certificate in Assessing Vocational Achievement
- Level 4 Award in the Internal Quality Assurance of Assessment Processes and Practices
- Level 4 Certificate in Leading the Internal Quality Assurance of Assessment Processes and Practices

## **Support for Candidates**

Materials produced by centres to support candidates should:

- enable them to track their achievements as they progress through the learning outcomes and assessment criteria;
- provide information on where ProQual's policies and procedures can be viewed;
- provide a means of enabling Internal and External Quality Assurance staff to authenticate evidence

### Links to National Standards / NOS mapping

National Occupational Standards (NOS) are owned by a Sector Skills Council or Standard Setting Body and they describe the skills, knowledge and understanding needed to undertake a particular task or job at different levels of competence.

The structure and units of this qualification are based on NOS for the construction sector.

### Assessment

This qualification is competence-based, candidates must demonstrate the level of competence described in the units. Assessment is the process of measuring a candidate's skill, knowledge and understanding against the standards set in the qualification.

The qualification must be assessed in line with the Construction Sector Qualifications Strategy and must be internally assessed by an appropriately experienced and qualified assessor.

Each candidate is required to produce a portfolio of evidence which demonstrates their achievement of all of the learning outcomes and assessment criteria for each unit.

Evidence can include:

- observation report by assessor
- assignments/projects/reports
- professional discussion
- witness testimony
- candidate product
- worksheets
- record of oral and written questioning
- Recognition of Prior Learning

**Learning outcomes** set out what a candidate is expected to know, understand or be able to do.

**Assessment criteria** specify the standard a candidate must meet to show the learning outcome has been achieved.

Learning outcomes and assessment criteria can be found from page 8 onwards.

## **Internal Quality Assurance**

An internal quality assurance verifier confirms that assessment decisions made in centres are made by competent and qualified assessors, that they are the result of sound and fair assessment practice and that they are recorded accurately and appropriately.

### **Adjustments to Assessment**

Adjustments to standard assessment arrangements are made on the individual needs of candidates. ProQual's Reasonable Adjustments Policy and Special Consideration Policy sets out the steps to follow when implementing reasonable adjustments and special considerations and the service that ProQual provides for some of these arrangements.

Centres should contact ProQual for further information or queries about the contents of the policy.

## **Results Enquiries and Appeals**

All enquiries relating to assessment or other decisions should be dealt with by centres, with reference to ProQual's Enquiries and Appeals Procedures.

## Certification

Candidates who achieve the required units for the qualification will be awarded:

- A certificate listing all units achieved, and
- A certificate giving the full qualification title -

### ProQual Level 2 NVQ Certificate in Roadbuilding and Maintenance (Construction) – Manual Road Building – Crack and Joint Repair (Manual)

#### **Claiming certificates**

Centres may claim certificates for candidates who have been registered with ProQual and who have successfully completed the qualification. All certificates will be issued to the centre.

#### **Unit certificates**

If a candidate does not achieve all of the units required for a qualification, the centre may claim a unit certificate for the candidate which will list all of the units achieved.

### **Replacement certificates**

If a replacement certificate is required a request must be made to ProQual in writing. Replacement certificates are labelled as such and are only provided when the claim has been authenticated. Refer to the Fee Schedule for details of charges for replacement certificates.

Title:	Conforming to general health, safety and welfare in the workplace.			
Unit Number:	M/508/6537	M/508/6537		
Learning outcome The learner will be a		Assessment criteria The learner can:		
1 Comply with all workplace health, safety and welfare legislation requirements.		1.1	Comply with information from workplace inductions and any health, safety and welfare briefings attended relevant to the occupational area.	
		1.2	Use health and safety control equipment safely to carry out the activity in accordance with legislation and organisational requirements.	
		1.3	Comply with statutory requirements, safety notices and warning notices displayed within the workplace and/or on equipment.	
		1.4	<ul> <li>State why and when health and safety control equipment, identified by the principles of protection, should be used relating to types, purpose and limitations of each type, the work situation, occupational use and the general work environment, in relation to: <ul> <li>collective protective measures</li> <li>personal protective equipment (PPE)</li> <li>respiratory protective equipment (RPE)</li> <li>local exhaust ventilation (LEV).</li> </ul> </li> </ul>	
		1.5	State how the health and safety control equipment relevant to the work should be used in accordance with the given instructions.	
		1.6	State which types of health, safety and welfare legislation, notices and warning signs are relevant to the occupational area and associated equipment.	
		1.7	State why health, safety and welfare legislation, notices and warning signs are relevant to the occupational area.	
		1.8	State how to comply with control measures that have been identified by risk assessments and safe systems of work.	
2 Recognise hazards associated with the workplace that have not been previously controlled and report them in accordance with organisational procedures.	h the t have not	2.1	Report any hazards created by changing circumstances within the workplace in accordance with organisational procedures.	
	em in ith	2.2	List typical hazards associated with the work environment and occupational area in relation to resources, substances, asbestos, equipment, obstructions, storage, services and work activities.	
		2.3	List the current Health and Safety Executive top ten safety risks.
